DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-11, drawn to High definition Video Compression over Fading Channel, classified in class 375, subclass 240.01.

Group 2, claim(s) 12-63, drawn to Scalable Video Coding (Coarse and Refinement Portion) and Mapping coarse and refinement portions into symbols of constellation, classified in class 375, subclass 240.26.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the Group I invention is High definition Video Compression over Fading Channel which is not present in Group II. The special technical feature of the Group II invention is the scalable video coding and mapping coarse and refinement portions into symbols which is not present in Group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an

election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
